

Air Compressor Energy Systems, Inc.

“Your Complete Source For Compressed Air”

Maintenance Agreement

ACES values your company's production up-time and productivity. Our goal is to help your company minimize any disruption to your production process.

Compressed Air & Vacuum is considered the fourth utility in the industry, and is the most costly. Proper care and monitoring are essential to ensure your system is running at optimal performance. Unlike the other utilities (gas, electric, and water) your air compressed systems require routine care that cannot be neglected.

ACES Maintenance Agreement is built to help our customers in maintaining their equipment properly thus reducing the costs associated with emergency service calls on poorly maintained equipment that can suddenly break down, causing a halt in production processes.

Regular Preventative Maintenance Plans for your compressed air equipment will not only increase the efficiency of the equipment it will also help keep your Manufacturing running smoother by ensuring your compressed air is clean and in minimizing down time.

Maintenance customers receive a reduced straight time labor rate of **\$ 85.00 per hr.** from our standard rate of **\$ 95.00 per hr.** on any and all work performed during regular business hours during the duration of signed agreement.

Labor is billed portal-to-portal per visit and all parts must be supplied by ACES which are additional. Each visit will be assessed a mileage fee of **\$1.50 per mile** along with a **Miscellaneous Fee of \$15.00** which covers environmental waste and other incidentals. Standard terms are net 30 days from invoice.

ACES will assume all responsibility for scheduling the required maintenance visits, logging work performed during each visit and record historical information such as faults, hours, oil samples and any repairs that were performed, required or recommended etc. Customers will be informed of their system conditions and of any repairs that may be needed between or during the next maintenance interval.

Air Compressor Energy Systems, Inc.

"Your Complete Source For Compressed Air"

Please choose preferred maintenance interval:

1 month 2 months 3 months 4 months 6* months

6-month does not qualify for the Maintenance Agreement rate of \$85.00 per hour

Along with full mechanical and electrical operation inspection, typical maintenance levels will service the following parts

Minor PM level One:

- Air Filter
- Oil Filter

Minor PM Level Two:

- Air Filter
- Oil Filter
- Separator

Major PM:

- Air Filter
- Oil Filter
- Separator
- Oil
- Pre/After Filters
- Drains
- Oil/Water Separators

****These levels are industry standards; your machine needs will vary based on manufacture recommendations hours, machine type, environment, etc.****

Items that are covered under this agreement but are not limited to include: Rotary Screw, Rotary Vane, Reciprocating and Scroll compressors, vacuum units, refrigerated and regenerative air dryers, coalescing filters, auto-drains, oil/water separators and liquid process chillers and pump skids.

It is acknowledged and agreed to that payment will be within standard terms and conditions.
